説明			
Project link on issues list, now redirects to projects/:project_id/issues instead of projects/:project_id !link_to_project_issues.png!			
journals			
I think it's way more useful than redirecting to project overview page.			
I'm not sure if this patch should be integrated as these value links (projects, users, and versions) were all initially supposed to be linking to the resource itself (its show view). See r1969 and #3086.
