説明

Additional option for the list or key/value custom field types where users could add new values to the list, with a mechanism similar to adding new categories or versions from the issue edit pane. Also see #25208 for more details.

journals

+1

key/values for a custom fields should be project specific, just like categories.

+1

This could be very handy, even if it's not project specific...

+1 This is would be super useful

Hi, we have developed a plugin that replies partially to this need :

Allows to add values to new type custom fields, in each project configuration :
