説明 The Redmine patch in @config/initializers/10-patches.rb@ breaks the functionality of @ActionView::Helpers::FormTagHelper::select_tag@, which states in the Rails documentation: <pre>:include_blank - If set to true, an empty option will be created. If set to a string, the string will be used as t and the value will be empty. [...] select_tag "people", options_from_collection_for_select(@people, "id", "name"), include_blank: "All" # => AllDavid</pre> With the patch a string value given for @:include_blank@ is not taken into account for the resulting option which will be @&nbsp;@ unless the option @:prompt@ is given. This means the above example will result in <pre>select_tag "people", options_from_collection_for_select(@people, "id", "name"), include_blank: "All" # => David</pre> PS: I did not check but this is possibly similar for the other patches trying to correct the invalid @@ My Redmine environment: • Redmine version 3.3.2.stable.16377 • Ruby version 2.3.1-p112 (2016-04-26) [x86_64-linux-gnu] • Rails version 4.2.7.1 • Environment production • Database adapter Mysql2
