説明

I am getting this exception when saving the attached wiki page to PDF.

```
Started GET "/projects/sandbox/wiki/User3.pdf" for 74.143.73.222 at 2017-04-26 12:00:05 +0000

```

Steps to reproduce

Create a wiki page called User3

Paste in the contents of the attached wiki_crash.txt file. Save

Click the PDF link at the bottom of the page. Get 500 error and the above exception in the logs

Edit the page and remove the last word "r" at the end of the table. Save

Click the PDF link again. Page saves successfully

Thanks for looking at this. This happens with textile, maybe your wiki syntax is still set to markdown?

I reproduced again on 3.3.3 (latest docker image) with that wiki page name and text.

This problem fixed by rbpdf 1.19.3.

please bundle update.

The latest rbpdf fixed the same problem on our customer's instance. Thank you for updating the gem.

I think it would be better to update Gemfile to ensure that the fixed version of rbpdf will be installed.

Gemfile is updated in 3.3-stable, 3.4-stable, and trunk, thanks.
