説明

I noticed a difference between the rendering of the query filter forms on the issues & spent time views and the query filter forms on the calendar and gantt views. I fixed it with the following changes:

- 1. Fix HTML structure of form#query_form on calendar/gantt views. This unifies the HTML structure of the query form on the calendars/show and gantts/show views to be the same as it is currently for the issues and spent time views, which were themselves unified into the new queries/_query_form partial in r15649.
- 2. Fix source indentation and newline usage. This unifies the source layout of the query form on the calendars/show and the gantts/show views with the queries/_query_form partial.
- 3. Unify form#query_form structure on calendar/gantt views. This: ** moves the p with inline style on the calendar view (which wraps the navigation buttons) out of div#query_form_content and adds the contextual class to the element to unify this with the gantt view (and to remove the inline style from the element now that it's styled through a stylesheets' style [contextual in fact]); ** restores the 12px font-size of the calendar navigation buttons; ** increases the font-size of the gantt zoom buttons to 12px; ** increases the margin of the calendar navigation and gantt zoom buttons to 12px 0px.
- 4. Add test assertions to the four controller test cases.

To make the changes a bit more visual, here some ASCII and image graphics:

I'll attach four patches implementing these changes. This patch serial, against current source:/trunk@16643, is produced using @git format-patch@ which makes the individual patches apply-able using "@patch -p1 < 0001-...@".

Environment:

Environment:	
Redmine version	3.3.3.devel@r16643
Ruby version	2.3.3-p222 (2016-11-21) [x86_64-linux]
Rails version	4.2.8
Environment	production
Database adapter	Mysql2
SCM:	
Subversion	1.8.8
Git	1.9.1
Filesystem	
Redmine plugins:	
no plugin installed	
journals	
Edit: seems like using thumbnails in tables causes some issues; replaced with regular image tags. Edit 2: for anyone searching for the visual differences: only the calendar and gantt views are affected by these changes Also attaching the patches. Looks good to me. Passed all test. Since we are freezing 3.4.0 now and this issue is a kind of refactoring, I think it would be better to set target version to 3.5.0 instead of 3.4.0. Patches are committed, thanks!
