説明

Following #21375#note-11, I made four additional (code) documentation changes:

-Complement external URL documentation.- +posted as #21375#note-11+

Fix typo in detailed Japanese textile doc. (the closing angle bracket seems superfluous)

Add user link documentation. (detailed syntax doc; this was still missing from #4179)

Fix code doc indentation. (in @ApplicationHelper#parse_redmine_links@)

Add code doc for forum & news links. (in @ApplicationHelper#parse_redmine_links@; this was missing from #9600)

I'll attach the four remaining patches implementing these changes. The patch serial, against current source:/trunk@16676, is produced using @git format-patch@ which makes it apply-able using "@patch -p1 < 0001-...@". This serial is a continuation of #21375#note-11 which includes patch 1/5 of this set, making these patches dependent on #21375#note-11 integration. I'll also change the respective wiki pages accordingly when the patches have been committed.

Environment:

Environment:

Redmine version	3.3.3.devel@r16676
Ruby version	2.3.3-p222 (2016-11-21) [x86_64-linux]
Rails version	4.2.8
Environment	production
Database adapter	Mysql2

SCM:

Subversion	1.8.8
Git	1.9.1
Filesystem	

Redmine plugins:

no plugin installed

journals

Committed, thanks.
