説明 Hello, I searched the doc and tried a lot of commands, but it appears the possibility to filter by custom field available for issues, does not work with projects. Is it possible to add this feature? GET /projects.json?cf_1=abcdef (if string) GET /projects.json?cf_2=1 (if boolean) GET /projects.json?cf_3=954 (if integer) Thanks :) journals related_issues relates,Closed,22966,Add ability search/filter project by project's custom fields
