説明 The attached patch implements copying of existing documents when a whole project is copied. This allows people to create a "template" project where they create documents which should later be updated.			
journals I think there is no reason not to have this feature. The patch works fine for me and passed all tests. Setting target version to 4.1.0. Committed. Thank you for sharing the patch.			
related_issues duplicates,Closed,5664,Copying documents too when copying a project
