説明

There is no "--no-color" argument for "git version" anymore.

Potential fix:

Index: lib/redmine/scm/adapters/git_adapter.rb
=====

```

     end

     def scm_version_from_command_line
-      shellout("#{sq_bin} --version --no-color") { |io| io.read }.to_s
+      shellout("#{sq_bin} --version") { |io| io.read }.to_s
     end
   end
end
```

journals

```
$ ./git --version
git version 2.14.0
$ ./git --version --no-color
error: unknown option `no-color'
usage: git version []

      --build-options      also print build options

$ ./git log --no-color | wc
 753470 3494163 28722346
$ ./git log | wc
 753470 3494163 28722346
$ ./git config -l | grep color
color.ui=true
```

I have committed r16948.
We cannot use self.superclass.client_version_above? because "git --version --no-color" fails.

I think I added "--no-color" to "git --version" at r4885 for preventing feature brokenness.
Committed in turnk, 3.4-stable, and 3.3-stable.
