説明 Hello I want to use the key/value list. When I try to enter a new possible value longer than 60 characters it won't be added to the available list. Also editing existiong entries with longer text won't be saved. Please set the textlength to 255 characters.			
journals The current, 60-char. limit is enforced by source:/trunk/app/models/custom_field_enumeration.rb@16970#L22. Mischa The Evil wrote: The current, 60-char. limit is enforced by source:/trunk/app/models/custom_field_enumeration.rb@16970#L22. Is there a chance, that this will change someday?
