説明 Sometimes people will not notice that they copied and pasted or inadvertently entered a whitespace when entering their email address in the lost password page. This currently leads to no password recovery being sent as the whitespaces will prevent a user from being found. journals The attached patch provides a test and strips whitespace from the entered email address. Sometimes users say "Lost password page is not working". I understood the reason by seeing this patch! Setting target version to 3.4.4. I think that we should fix also the related issue (#22532) because is almost on the same topic. Committed in the trunk and merged to 3.4-stable. Thank you for detecting and fixing this issue. related_issues relates,Closed,22532,Strip whitespace from login on login page
