説明 I want the function to display only the tickets that arrived on the due date on the calendar (URL and button designation) In large-scale project management, A large amount of tickets today with start date / due date are displayed on the calendar. Managers want to check the processing situation for today / near-term deadline tickets. In this case, I do not want to display the start date. That is not important. journals Do you mean a feature like this? !{width: 773px; border: 1px solid #ccc;}.calendar-options@2x.png! Thanks for your comment. That's right. It is good to be able to select the start date and the due date separately. related_issues relates,New,6300,Add a filter for items displayed in gantt view (version, issues)
