I have over 2000 members in a non-public project. Hence, these members get shown on the overview page. This makes the display of the overview page take around 3-4seconds.

..

    Rendered   projects/_members_box.html.erb   (579.5ms)
    Rendered   projects/show.html.erb   within   layouts/base   (596.2ms)

....
Completed   200   OK   in   3430ms   (Views: 622.8ms   ¦   ActiveRecord: 37.4ms)

journals

Please see [[submissions]].

Environment:
    Redmine   version   3.4.3.stable
    Ruby   version   1.9.3-p484   (2013-11-22)   [x86_64-linux]
    Rails   version   4.2.8
    Environment   production
    Database   adapter   Mysql2
SCM:
    Subversion   1.8.8
    Git   1.9.1
    Filesystem
Redmine   plugins:
    redmine_agile   1.4.5
    redmine_contacts   4.1.1
    redmine_contacts_helpdesk   3.0.9

(I also tried with ruby 2.1.5 but that was the same). The group has 2222 members which get shown on the members list on the overview page, with no option to turn this listing off.

+1

In the case of a large-scale environment, it seems that you should set the access authority on a group basis, and display it by the group name unit.

I used LotusNotes before Redmine,
In the access right setting screen of LotusNotes, it was displayed in the group definition unit used for the ACL setting.

+1

We are using it as a helpdesk, with huge number of issues, totally blocks system and uses much resources!
