説明 The CI Server (http://www.redmine.org/builds/) uses Ruby 2.4.1. But the current stable release is 2.4.3 which has been released on December 14th. I think we should use Ruby 2.4.3 to ensure that Redmine works with the latest stable Ruby. Ruby versions on the CI server: • 2.4.1 • 2.3.4 • 2.2.7
