説明 Pretty straightforward. After #20513, the statement should be removed from the bundled example plugin too (i.e. r1282 should be reverted). The following raw patch (against source:/trunk@17169) takes care of this: Index: extra/sample_plugin/app/controllers/example_controller.rb <pre>===== --- extra/sample_plugin/app/controllers/example_controller.rb (revision 17169) +++ extra/sample_plugin/app/controllers/example_controller.rb (working copy) @@ -1,7 +1,5 @@ # Sample plugin controller class ExampleController < ApplicationController - unloadable - layout 'base' before_action :find_project, :authorize menu_item :sample_plugin</pre>			
journals Committed to the trunk. Thank you for pointing it out. Merged to 3.4-stable.			
related_issues relates,Closed,20513,Unloadable plugin convention breaks with Rails 4.2.3
