説明 How to reproduce (with vanilla redmine 3.4): • Go to a project where you are a member with Role A • create a query and save it. make it visible to Role B • Save the query Result: • Error 403 In my opinion, a query should always be visible to its author, provided that he has sufficient rights to access the project. How to fix it: Here: https://github.com/redmine/redmine/blob/7fd04e1f8d36d78ee4f680d0a312c9eac2c65e90/app/models/query.rb#L339 In the case above, a simple check on @user == self.user@ should fix the problem
