説明

I believe that it would be a lot of help to everyone in the project portfolio management resource. I have a large number of concurrent projects occurring in the company and would like to categorize them.

journals

Hi,
You may use some plugins like "Redmine Monitoring & Controlling":<http://alexmonteiro.github.io/Redmine-Monitoring-Controlling/> and also rearrange your projects in hierarchy.

Edit by Mischa The Evil on 20180224: fixed plugin link.

Hi, Iranzamin. This version are incompatible with 3.x redmine. Thanks by your attention.

Luis - I have the same need on my side in Redmine.

There seems to be a plugging for that: https://www.redmine.org/plugins/redmine_portfolio_management

I haven't gotten a chance to verify it yet technically. Do you think it would work for you?

Hi Dominik, this plugin appears to be great but not run at 3.3.x version. Thanks
