If I export a single issue from the issue page (i.e. /redmine/issues/3400) textile codes (i.e. %{color:red} text %) export correctly. Showing the color in the PDF

From the issue navigator /redmine/issues an export to PDF or CSV shows the textile code

**journals**

I cannot reproduce on the current trunk.

**Can you describe the testing steps to reproduce the issue? Or you can try without plugins?**
