| 説明 | |
| Example: info@ Checked in the registration form. | |
| journals | |
| Current versions of Redmine accepts only alphabets, numbers, and hyphens for the domain part of email addresses (source:tags/3.4.5/app/models/email_address.rb#L29). | |
| Please use "Punycode": https://www.punycoder.com/ to avoid this issue. For example, use " info@xn--80aswg.xn--90ais " instead of "info@ . ". | |
| I posted a patch to support IDN (internationalized domain names) as #29208. You will be able to Russian domain names if the patch is merged. | |
| Thank you so much! | |
