## redmineorg-copy202205 - Vote #79357

## Show the existing attachments on the wiki editing page

2022/05/09 18:33 - Admin Redmine

<pre>ktmg When attaching a new file on the wiki edit page, the file name is displayed. However, existing attachments are not displayed. This information is useful for displaying existing attachments as inline images (ffile_name.png!). ex) [{width: 30%}example.png! journals +1 for Mizuki ISHIKAWA ' s idea! I wrote a patch to implement this feature. +1 I would be very happy if I could see the feature in Redmine. Nice feature. I think that it'll be useful also to add the "Delete multiple attachments with one action" feature implemented for issues in #13072, but we can do it in another ticket. 			#edit page?	
Go MAEDA wrote:				

Would you explain why the patch disables 'Delete' button on wiki#edit page?

If you delete a file during editing on wiki#edit page, its contents will be discarded.

Therefore, I added deletable options so that 'Delete' button is not displayed.

## Thank you for the clarification. I found a very similar issue #28953. I think we should resolve it before moving this issue forward.

Thank you for all the work for this feature.

I think that if #16410 were implemented that feature could meet my needs.
