説明			
If I copy an issue with a non-empty category and clear the category field, the category is still set in the new (copied) issue.			
Environment:			
Redmine version 3.4.5.stable			
Ruby version 2.3.7-p456 (2018-03-28) [x86_64-linux]			
Rails version 4.2.8			
Environment production			
Database adapter Mysql2			
SCM:			
Git 2.14.1			
Filesystem			
Redmine plugins:			
redmine_agile 1.4.6			
DB:			
mysql 5.6.39			
journals			
This was working before the upgrade (3.1.0 -> 3.4.5)			
Confirmed the problem. This is due to r17320. The trunk is affected but stable branches are not.

This problem should be fixed by r17395.			
But the OP is using a stable branch, can you confirm?			
Jean-Philippe Lang wrote:

No, I cannot reproduce it on 3.4.6. Probably the reporter is using the master branch of https://github.com/redmine/redmine . It is not an svn working copy, so Redmine does not add ".devel.nnnnn" information to the version number.			

I think we can close this issue.
