説明

Hi. Im making a migration from Redmine 2.6 to Redmine 3.3 and Redmine 3.4 and I have this situation. In an existent issue I created a new subtask succesfully but I can't see the relation between them, neither the subtask, nor the parent issue. But when I create a new Issue and a new subtask there is no problem.

This are my two environments where I test this.

Environment:

```

Redmine version      3.3.8.stable.17383
Ruby version         2.3.5-p376 (2017-09-14) [x86_64-linux]
Rails version        4.2.7.1
Environment          production
Database adapter     Mysql2
Database version     5.5.60

```

SCM:

```

Subversion           1.8.10
Git                  2.1.4
Filesystem

```

Redmine plugins:

```
no plugin installed
```

Environment:

```

Redmine version      3.4.6.stable.17383
Ruby version         2.3.5-p376 (2017-09-14) [x86_64-linux]
Rails version        4.2.8
Environment          production
Database adapter     Mysql2
Database version     5.5.60

```

SCM:

```

Subversion           1.8.10
Git                  2.1.4
Filesystem

```

Redmine plugins:

```
no plugin installed
```
