説明

If time is entered on a date prior to an issue's start date, the API reports the start date of the issue in the XML response, not the "spent_on" date entered into the time commit.

Environment:
Redmine version 3.2.6.stable
Ruby version 2.3.3-p222 (2016-11-21) [x86_64-linux]
Rails version 4.2.7.1
Environment production
Database adapter Mysql2
SCM:
Subversion 1.8.10
Mercurial 3.1.2
Bazaar 2.7.0
Git 2.1.4
Filesystem

Redmine plugins:
no plugin installed

journals

I could not reproduce the problem. Could you describe detailed steps to reproduce?

Create an issue, then log time against that issue with a "spent_on" date from before the create date of the issue. Then pull that time via the API.

For me, the "spent_on" date changes to the create date of the issue, not the spent_on date of the time entry.

I still cannot reproduce it on the current trunk (3.4.6.devel.17428).

I created an issue !#148 on 2018-07-03. Then, logged 12 hours of spent time for 2018-07-01. After that, I made an API request and got the following response. The value for "spent_on" is "2018-07-01". I could not find any problem.

```
{
  "time_entry": {
    "id": 41,
    "project": {
      "id": 1,
      "name": "eCookbook"
    }
  }
}
```

```
{
  "issue": {
    "id": 148
  },
  "user": {
    "id": 1,
    "name": "Admin Redmine"
  },
  "activity": {
    "id": 10,
    "name": "Development"
  },
  "hours": 12,
  "comments": "",
  "spent_on": "2018-07-01",
  "created_on": "2018-07-03T07:00:18Z",
  "updated_on": "2018-07-03T07:00:18Z",
  "custom_fields": [
    {
      "id": 10,
      "name": "Overtime",
      "value": "0"
    }
  ]
}
```
