<b>説明</b>			
<p>This patch makes the following two changes</p> <ul style="list-style-type: none"> <li>• Add my page to application menu</li> <li>• Change to display application menu on my page screen</li> </ul> <p>This patch makes it easier to move from My Page to issues and activities. !my_page.png!</p>			
journals			
<p>With this patch, there would be two top-level links to the My Page (similar to the Projects link/tab).</p> <p>I think this should be unified to avoid having multiple links with the same text point to the same (or slightly different?) views on all or most pages.</p> <p>Holger Just wrote:</p> <p style="padding-left: 40px;">With this patch, there would be two top-level links to the My Page (similar to the Projects link/tab).</p> <p style="padding-left: 40px;">I think this should be unified to avoid having multiple links with the same text point to the same (or slightly different?) views on all or most pages.</p> <p>Indeed, that are my thoughts too (posted in #29184).</p>
