Hello,
When I make an API call to get all the trackers of a certain tracker_id including the relations, it doesn't work.
I use:

/issues.json?tracker_id=XXX&include=relations

I just have the content of the issues, as if I didn't put "&include=relations"

However, it works when I call

/issues/[number of issue].json?include=relations,attachments

It seems to have a problem fetching issues with includes and parameters.

Here is the info:

- database manager version: Mysql2
- Ruby version: 2.4.1-p111 (2017-03-22) [x86_64-linux]
- Rails version: 4.2.8
- Redmine version: 3.4.2 stable

Thanks for the help.
César
