説明

We should update mail gem to 2.7 by the following reasons.

- Defect #29442 will be fixed if we update mail gem to >=2.7.0.
- Patch #29359 has replaced mime-types to mini_mime but mime-types is still loaded to memory because mail 2.6 uses mime_types. They switched to mini_mime in mail 2.7.0.

journals

I am waiting for the release of mail gem 2.7.1. It should fix #29365 and #27691.

mail 2.7.1 was released
<https://rubygems.org/gems/mail/versions/2.7.1>

Committed.
