説明			
<p>I would like to have a flag that can restrict time logging against a particular type of Tracker. e.g. time can be logged against 'Bug' or 'Task' but not against 'Feature'</p> <p>In the projects in our setup, we have created a custom type called 'Epic' which represents a big feature that could span across sprints. Epic will contain Features. And users should not be able to log time against custom type 'Epic' or 'Feature'</p>
