The character sequence described in the subject is always rendered as "&" in Textile formatter. You can easily reproduce this issue by entering the sequence in a description field of an issue.

You see '@=> "&"@' in the second line of the following text. Actually, it is 'x % x %' (I cannot spell it without spaces due to the bug).

```
2.3.3 :001 > ['x', '%', 'x', '%'].join
  => "x%x%"
```

journals

This is because RedCloth temporarily replaces "&" with "x % x %" (actually, there are no space characters) while converting Textile to HTML.
