説明

Currently, you have to go to the detail page of an issue if you want to see the list of watchers.

I think it would be nice if Redmine shows watchers for each issue on the issues list. With this feature. This feature is a bit similar to #25515.

journals

!{width: 70%; border: 1px solid #ccc}watchers.png!

Looking at watchers at index is useful for knowing issues that users are interested in.

Applying this patch will allow you to add a watchers column with issues / index.

Issue#visible_watchers checks the :view_issue_watchers permission and displays only watchers that can be viewed.

I think this column gets really messy if you have 10 or more watchers on the list.

I'd also argue that this information isn't useful by any means. Perhaps the count of watchers but not the entire list.

+1

+1

that's indeed useful (and if not, well then do not add this column to your issues list :)

+1 but I agree with Bernhard

I think this column gets really messy if you have 10 or more watchers on the list.

I'd also argue that this information is useful by any means. Perhaps the count of watchers but not the entire list.

Maybe watcher count, but to show list of watchers in the tool-tip whenever rolling over the number of watchers. The same tool-tip which is used in the gantt or calendar.

How to add the patch to Redmine? I'm getting these errors. I'm using Redmine from Bitanmi.

```
C: /Bitnami /redmine-4.2.1-0 /apps /redmine /htdocs>patch -p0 < 123.patch
can't find file to patch at input line 5
Perhaps you used the wrong -p or --strip option?
```

The text leading up to this was:

```
|diff --git a/app/helpers/queries_helper.rb b/app/helpers/queries_helper.rb
|index 01d10d883c..1d721d7528 100644
|--- a/app/helpers/queries_helper.rb
```

```
|+++ b/app/helpers/queries_helper.rb
```

File to patch:

Version Information

```
Environment:
Redmine version      4.2.1.stable
Ruby version         2.6.7-p197 (2021-04-05) [x64-mingw32]
Rails version        5.2.5
Environment          production
Database adapter     Mysql2
Mailer queue         ActiveJob::QueueAdapters::AsyncAdapter
Mailer delivery      smtp
SCM:
Git                  2.31.1
Filesystem
```

Redmine plugins:

no plugin installed

You can apply the patch with a command like this:

```
patch -p1 < feature-29894.patch
```

However, since this patch was written two years ago, I'm not sure if it will work for the current Redmine.

related_issues

```
relates,New,6299,Add "watched" as possible column in issues list
relates,New,36848,API allow display "watchers" when listing several issues
```
