説明 Please provide "Edit authored issues" and "Edit assigned issues" in issue tracking permission of Roles and permissions setting for Redmine 3.4.6.stable version. Please suggest if any alternate method to achieve the same if already available.			
journals			
"Edit own issue" permission was implemented for upcoming Redmine 4.1.0 (#1248). +1 for the "edit assigned issues", as the "edit own issue" permission only lets you edit those which you directly create and not the ones which you are assigned to, could be also solved by adding a setting in the "fields permission" workflow setting if there was a "Additional fields permissions when the user is the assignee" like the ones for the status transitions in the same workflow setting. Hello! Sorry for disturbing. Maybe there is a method to edit only assigned issues? Maybe i can change some configuration file to change "own issues" to "assigned issues" becouse "own issues" button is not so helpful for my purposes? It wold be very helpful if somebody know how to do this.
