説明

To reproduce, add to the project description an unordered list and open the projects index page.

Without the patch:
!{width:50%;border:1px solid grey}.before.png!

With the fix applied:
!{width:50%;border:1px solid grey}.after.png!

At least the current stable version is affected.

journals

Confirmed with 3.3-stable.

But I think this may be what Jean-Philippe Lang intended because you can see the following code in @application.css@.

```
ul.projects li {list-style-type:none;}
```

Committed, thanks.
