説明

I was generated Redmine reference with version infomation. See below.

- <http://sho-h.github.io/redmine/3.3/index.html>
- <http://sho-h.github.io/redmine/3.4/index.html>
- <http://sho-h.github.io/redmine/4.0/index.html>

This was generated by only executing \$ bundle exec rake yard. We can see codes "here":

https://github.com/sho-h/redmine/tree/rich_reference_for_plugin.

Add new "yard template":

https://github.com/sho-h/redmine/tree/rich_reference_for_plugin/doc/yardoc/templates/rich_reference

Add "redmine version info":

https://github.com/sho-h/redmine/blob/rich_reference_for_plugin/doc/yardoc/redmine_changes.yml

git checkout

yard doc --no-output && mv .yardoc .yardoc. # generate only .yardoc

Repeat 1. and 2. with all tag

yard diff .yardoc. .yardoc.

Repeat 4. with all tag

Reform all 4. and 5. result to redmine_changes.yml

Fix yard "rake task":

<https://github.com/sho-h/redmine/commit/18c65ed66629f318836019446c76cc4ac4bb6ef1> to use a new template

I want to publish either of the following to maintain redmine plugins easily.

- redmine.github.io/redmine// # need to create gh-pages branch on Github mirror
- yardoc.redmine.jp/Redmine// # need to talk with @g_maeda san?

journals

#28996 is related with this ticket.

We can see codes here.

Maybe, version info should be belongs to generator only to generate past version.

I will create redmine plugin to overwrite rake yard task(in lib/tasks/yardoc.rake) and maintain it if this suggestion will be accept.
