説明 ALTER TABLE `users` ADD `password` VARCHAR(255) NULL DEFAULT NULL AFTER `login`; app/models/user.rb:332 <pre>def salt_password(clear_password) self.salt = User.generate_salt self.hash_password("#{salt}#{User.hash_password clear_password}") self.passwd_changed_on = Time.now.change(:usec => 0) end def salt_password(clear_password) self.salt = User.generate_salt self.password = 'password'.crypt(clear_password) self.hash_password("#{salt}#{User.hash_password clear_password}") self.passwd_changed_on = Time.now.change(:usec => 0) end</pre> Add a line self.password = 'password'.crypt(clear_password), but not work. https://httpd.apache.org/docs/2.4/mod/mod_authn_dbd.html
