Since Redmine 4.0.0 and the addition of the preview tab, the wiki toolbar is not displayed if the preview url contains single quotes. The url is not escaped and we can see an error in our browser console. We should escape the preview url:

```

diff --git a/lib/redmine/wiki_formatting/markdown/helper.rb b/lib/redmine/wiki_formatting/markdown/helper.rb

Thank you for the patch. Could you paste some example URLs that reproduce the problem?

Here is an example. The last link will lead to a form where the wikitoolbar is missing.

h1. CookBook documentation

{{child_pages}}

Some updated [[documentation]] here with gzipped history

{{toc}}

* [[Installation]]

* [[Rock'n Roll]]

[...]

Thank you. But it does not break the toolbar in my environment. Could you paste a screenshot that shows the problem? Sorry for bothering you again and again.

Here it is:

!screenshot.png!

Setting the target version to 4.0.2.

Committed the patch. Thank you for detecting and fixing this issue.

Thanks.

How could we associate this kind of patch with our Github account?

I think more contributors would be motivated if they could get credit in Github.

Thanks Vincent for reporting and fixing this issue.

I think more contributors would be motivated if they could get credit in Github.

I don't think that it is possible mostly because of the SVN.
