説明

Drag and drop file to "file custom field" is not behaving as expected. File is attached as regular file insted to Custom field. Demonstration is attached at "file_dragNdrop.gif".

journals

Is this defect planned to be fixed soon?

I have attached a patch to fix this issue.

Setting the target version to 4.2.0.

Thank you for posting the patch but I found a strange behavior when trying to upload files.

An error message @:error_attachments_too_many@ is displayed when you attempt to drop two or more files. It is OK. However, you will see a dialog box with the message (n - 1) times. For example, if you drop 10 files to a file type custom field, you have to click the "OK" button 9 times to close dialog boxes.

This is a problem that occurs not only with custom fields, but also with regular file attachments.(If you attach 20 files at the same time, you need to delete the alert 10 times.)
Probably another issue related to #18555.

Fixed in r20711.

Committed the patch. Thank you for your contribution.
