説明

Hi Redminers :)

has any one from you an idea how can i define a color for each Project to show it in the projects background in the main projects view page ?

example in the attachments.

Thanks in Advanced :)

journals

Can you set the color arbitrarily on the Project Settings Information tab or make it possible to set the color for each category?

But I think that it is better to be able to set it arbitrarily because there is also a demand for all projects to be different colors.

there is no Color arbitrarily Option in the Project Settings Information tab !!

sorry, it is just my idea.

I should have written "+1".

+1
