説明

Hello,
When I press F5 for refresh, the page display after is different from the first. IS it a bug or this can be change somewhere ?
Best regards

journals

Please describe more details. Which page did you hit F5 key and which page were you redirected to? Probably reading [[Submissions]] is useful for you to post a more helpful report.

Hi,
sorry.

When I press F5-> I need to be back on the same page.
Example:
I'm on the page config, If I press F5, after refresh, I need to be back on this page config.
If I'm on the page Issue with a config filter --> I need to be back on this page Issue.

Is it possible ?
