説明

I'm trying to use Time Entries REST API and it works as expected except user_id parameter.

When I tried to get time entries
https://myredmine/time_entries.json?key=mykey&from=2019-06-01&to=2019-06-30&limit=5&user_id=5 I'm getting time entries of all existing users.

Any suggestions?

journals

I cannot reproduce the issue with Redmine 4.0.5.devel.19345. The following request returns time entries of user_id 2.

```
curl 'http://redmine-trunk.test/time_entries.json?from=2000-01-01&to=2019-12-31&user_id=2'
```
