説明

In the administration area, the list of projects exposes the creation date, i.e. this information does already exist for each project. A project contains a creation date.

Could this little date be shown anywhere on the project overview page, please? Not editable or so. Just show this information. Because if one is not an administrator the creation date of the project cannot be figured out.

Optionally, the creation date could be shown an the project overview page. But I guess you don't like to populate that page with any additional information, as long as #29482 is not realized.
