説明

When copying a project in the projects list(Administration > Projects), you can disable sending an email by unchecking the "Send email notifications during the project copy" checkbox.
However, even if this checkbox is unchecking, email notifications are sent.

journals

The option does not work since Redmine 4.0.0. Probably it is caused by #26791. Replacing @deliver_later@ with @deliver@ in @app/models/mailer.rb@ can be a quick-and-dirty workaround.

this method is problematic and should be deprecated because it can't reliably work with async deliveries
<https://github.com/redmine/redmine/blob/master/app/models/mailer.rb#L611>

it might be better not to generate emails at all if you don't want to send them
