説明			
Redmine::MimeType.css_class_of('foo.gz')			
# => "application-gzip"			
journals			
In my environment, @Redmine::MimeType.css_class_of('foo.gz')@ returns "application-x-gzip" in 2.6-stable but "application-gzip" in 3.0-stable.			
Probably it has been broken since Redmine 3.0.			
Committed the patch. Thank you for catching and fixing the issue.
