説明

Hi,
Where can I find some plugin which convert files ods (LibreOffice) or xls (Microsoft Office) to redmine table?

For now, I and my friends are using my own tool (<https://www.s2rc.miszczk.dev>) but it is very old (about 4 years) and built-in option or plugin would be much better.

Currently my tool only supports:

- Calculating formulas (for example: "=sum(A7:K17)")
- Merged cells
- Bold font
- Italic font
- Font color
- Background color
- Text aligning (left/center/right)

I would be nice if built-in option or plugin create the same output or better.

Output from my tool using xls file (converted from ods file in LibreOffice) :

```

\11>{background:#FFFF00}. Komórki scalone poziomo|
\2=. 1|/3={background:#00331A}. 2|\2={background:#99FF66}. %{color:#FF0000}3%|={background:#EEEEEE}. <= suma A2 +
