Expected response to be a <2XX: success>, but was a <404: Not Found>

bin/rails test test/integration/attachments_test.rb:148

I think the reason why the test failed is that Attachments under test/fixtures/files/ is missing.

I think I should call to @set_tmp_attachments_directory@ . I attached a patch.

journals

LGTM. Setting the target version to 4.2.0.

@set_tmp_attachments_directory@ and @set_fixtures_attachments_directory@ are methods which change @Attachment.storage_path@ during tests.

If a test method which creates/deletes attachments, @set_tmp_attachments_directory@ has to be called at the beginning of the method in order not to destroy the contents in @test/fixtures/files@ directory. Some test methods which uses files in @test/fixtures/files@ call @set_fixtures_attachments_directory@ in order to set @Attachment.storage_path@ to @test/fixtures/files@ . Those test methods should call @set_tmp_attachments_directory@ at the end. Otherwise, you may observe some test failures.

This patch ensures calling @set_tmp_attachments_directory@ in some tests, in order to fix test failures which occurs occasionally.

Committed the patch. Thank you for investigating the test failure.
