説明

use #reload instead, after upgrading to Rails 5

journals

Thanks Pavel for posting the patches for Rails 6 update.

I've applied this patch on the current trunk and a test fails:

```
Failure:
AttachmentsTest#test_upload_and_resubmit_after_validation_failure [/builds/redmine-org/redmine/test/integration/attachments_test.rb:113]:
Expected at least 1 element matching "input[name='attachments[p0][description]'][value='My uploaded file']", found 0..
Expected 0 to be >= 1.
bin/rails test test/integration/attachments_test.rb:99
```

You can see the test results "here":
<https://gitlab.com/redmine-org/redmine/pipelines/113514724>.

sry, thanks for catching this, I was confused about the comment. Closing

Let's keep it open, maybe we can fix the issue.

This change passes all the tests now: <https://gitlab.com/redmine-org/redmine/-/pipelines/280930686>

The fail reported by me above was caused by another issue that was fixing as part of Rails 6.1 update.

Committed the patch. Thank you.
