**説明**

It would be nice for a user to be able to set a "Dark Mode" for the Redmine UI.

This would allow people who prefer working with darker colours or have light-sensitivity issues to be able to use Redmine without any issues.

Many apps and mobile devices offer Dark Mode as a standard per-user setting.

journals

Many apps and mobile devices offer Dark Mode as a standard per-user setting.

Would love to have this feature on my website
