説明

If the done ratio is not linked to the issue status, the done ratio must be manually updated when the issue is closed.

This plugin supports my opinion.
https://github.com/phqsh/redmine_issue_completion

journals

Here is a patch, written by Mizuki ISHIKAWA, jun0-nishizaki and me.

Sorry, I've found some tests fail on this patch. We'll fix this later.

It turned out that a condition in done_ratio_editable? was wrong.

I have attached a fixed patch.

Thank you for posting the patch but I think the behavior that status is set to 100% on the edit page is sometimes problematic.

Suppose the following senario.

1. A user mistakenly select "Closed" status. The done ratio is immediately changed to 100%
2. Actually, the user wants to set the status to "In progress". So, the user re-select the status
3. Although the issue is not going to be closed, done ratio remains at 100%

Probably The user does not want the done ratio to be updated to 100%.
