Currently, the global search does not take the values of the custom fields into account.
Can you please add this? Many thanks in advance!

journals

If you check the "Searchable" checkbox in the edit page of a custom field, the values of that custom field will be searchable.

I use Redmine version 4.2 and in the edit page of the custom field, there are *only two* checkboxes: @required@ and @use as [filter@](#).
If I tick @use as filter@ it is still not found in the search.
My custom field belongs to a *@version@* (in the roadmap) - maybe this is the problem.

Indeed, version custom fields are not searchable.

Ok. So can someone please add this feature? This would be very nice - thanks in advance!
