redmineorg-copy202205 - Vote #81456

Hyperlinks ending in "$" will be truncated (the trailing "$" sign will not be part of the URL to be pointed to)

Hyperlinks ending in "$" will be truncated (the trailing "$" sign will not be part of the URL to be loaded).

e.g.:

https://this.is.a.example/withtrailing$ (hover over the URL and look what is shown in the browser status line, resp. you see the "$" is not contained in redmine's URL).

Our Mail-URL-Scanner replaces incoming URLs with redirects to the scanner. The generated new URL contains a trailing "$", so the URLs are no more recognized by the scanner and do not work.

journals

I think is related to #30259#note-4:
