説明			
<p>In order to manage our Implementation Project better, I created a Project X. In order to better organize our task I also created a tracker for Project.</p> <p>The trackers I have are:</p> <ul style="list-style-type: none"> • Project • Programming Request • Support • Bug • Training <p>The hierarchy of the project is as follow :</p> <ul style="list-style-type: none"> • Project X ** Project (Tracker) = Project Implementation *** Programming request 1 - Precedes (Support 2) *** Support 2 Precedes (Support 3) *** Support 3 <p>When I make a copy of the Project Implementation, the subtasks Programming request 1, Support 2, Support 3 do copy however the Precedes values does not copy over.</p> <p>Anyone else has this issue?</p> <p>Ideally what I would love to do is copy the Project Implementation as a template and push the dates based on the Project Implementation for other projects moving forward</p>
