説明

Currently, tables written in Wiki notation do not have a background color.
 This patch adds a background color to make it easier to distinguish header rows from non-header rows.
 It will also change the color of the row to yellow when the cursor is hovering over it.

Sample:

```
!{width: 500px; border: 1px solid #ccc}sample.png!
```

journals

If you write the table in the issue description, it will look like this:

```
|Before change|After change|
```

```
!|before_change.png!|!after_change.png!
```
